

West Coastal Corridor — KRI pillar scores by district

■ Kaş ■ Kemer ■ Finike ■ Kumluca ■ Demre Dashed line = 0.50 threshold

37 normalised indicators — cell colour encodes resilience score (cool = weak, warm = strong)

P1 — Natural Hazard & Physical Vulnerability

P2 — Socio-Demographic Adaptive Capacity

P3 — Economic Resilience

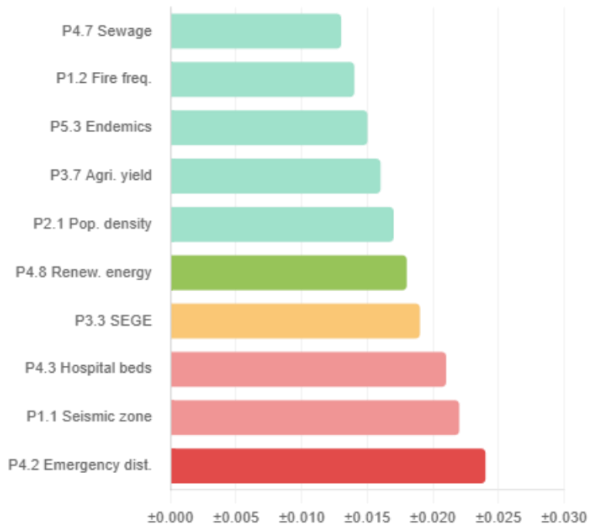

P4 — Infrastructure & Service Continuity

P5 — Environmental & Cultural Capital

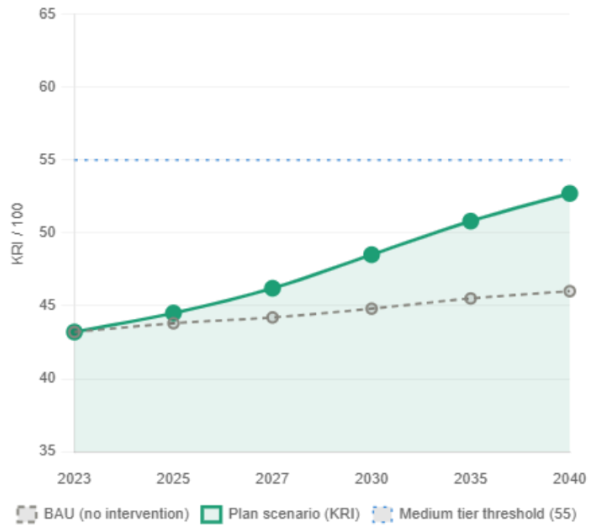

Sensitivity — indicator impact on KRI (±10% perturbation)

Top driver: **P4.2 Emergency distance** — structural geographic constraint. If reduced by 50% (sea link + air medevac), KRI +4.5 pts.

Resilience trajectory — BAU vs. Plan scenario 2023→2040

Plan scenario reaches **52.7 / 100** by 2040, approaching the Medium tier threshold (55). BAU stagnates at ~46.
